RE: Legal Notice of Intent to Approve

This letter will confirm the authorization to publish the attached NOTICE in the Salt Lake Tribune and Deseret News on April 7, 2024.

Please mail the invoice and affidavit of publication to the Utah State Department of Environmental Quality, Division of Air Quality, P.O. Box 144820, Salt Lake City, Utah 84114-4820. If you have any questions, contact Jeree Greenwood, who may be reached at (385) 306-6514.

Sincerely,

Jeree Greenwood
Office Technician

Enclosure

cc: Wasatch Front Regional Council

NOTICE

A Notice of Intent for the following project submitted in accordance with R307-401-1, Utah Administrative Code (UAC), has been received for consideration by the Director:

- Company Name:** Southwest Grading and Paving, LLC
- Location:** Southwest Grading and Paving, LLC - Portable Aggregate Source – Not Permanently based at a Site, Portable Source, UT
- Project Description:** Southwest Grading and Paving, LLC has requested an Approval Order for a portable source. The portable source belongs to the nonmetallic mineral processing industry, including aggregate, concrete, and hot mix asphalt plants. The plants shall be temporarily operated for a period of not more than 180 working days at any location. A relocation shall not exceed 365 consecutive days at any location in the State of Utah. Dispersion modeling results have determined that there will be no adverse impacts on air quality at the nearest residence or commercial establishment if the source operates at a location in compliance with the AO, the Notice of Temporary Relocation, and the Temporary Relocation Approval Letter. Compliance with the opacity limits and operating practices contained in the conditions of the Approval Order shall be considered as application of BACT. The emission control measures required under the conditions of the Approval Order shall apply to all of the locations at which the source operates. The source may be required to adopt additional measures for controlling emissions to address location-specific concerns.

The completed engineering evaluation and air quality impact analysis showed the proposed project meets the requirements of federal air quality regulations and the State air quality rules. The Director intends to issue an Approval Order pending a 30-day public comment period. The project proposal, estimate of the effect on local air quality and draft Approval Order are available for public inspection and comment at the Utah Division of Air Quality, 195 North 1950 West, Salt Lake City, UT 84116. Written comments received by the Division at this same address on or before May 7, 2024 will be considered in making the final decision on the approval/disapproval of the proposed project. Email comments will also be accepted at dunganadams@utah.gov. If anyone so requests to the Director in writing within 15 days of publication of this notice, a hearing will be held in accordance with R307-401-7, UAC.

Under Section 19-1-301.5, a person who wishes to challenge a Permit Order may only raise an issue or argument during an adjudicatory proceeding that was raised during the public comment period and was supported with sufficient information or documentation to enable the Director to fully consider the substance and significance of the issue.

Date of Notice: April 7, 2024
